

Senior Project Manager

At *Stiesdal PtX Technologies A/S* we offer the opportunity to make a real difference in the fight against climate change. Our team of creative thinkers are making true impact and joining us could be the most exciting and fulfilling step in your career.

Are you up for the challenge?

We are currently looking for experienced project managers to help realize our ambitious plans for Power-to-X hydrogen production.

Power-to-X, from concept to commercial scale

You will be managing our projects focusing on developing a new type of hydrogen production plants. Your job will involve concept development, detailed design work, manufacturing, and physical testing in the laboratory.

Your primary tasks will be:

- Project planning, budgeting, and execution
- Being responsible for project progress and reporting
- Planning and scoping of tasks
- Stakeholder management
- Process development

Your profile

You have several years of experience with managing complex projects with many stakeholders, preferably from a relevant industry with focus on cost optimized solutions.

We expect you to approach your work with enthusiasm and to be self-driven, passionate, and committed. It is natural for you to take on responsibility and you are confident in the role of leading large and complex projects. You perform well in the dynamic environment of a start-up organization.

What we offer

We offer an exciting and varied job where you will be an integral part of the design team creating new technology with a high impact on climate change mitigation.

Our core values are honesty, integrity, and respect for people, and we firmly believe in the fundamental importance of trust, openness, teamwork and professionalism, and pride in what we do.

The working location is at our headquarters in Give.

About us

Stiesdal PtX Technologies A/S is developing cost-efficient systems for green hydrogen production. During 2020 the company has validated its concepts and in 2021, the first medium scale plant will be established.

We are part of Stiesdal A/S, a new and fast-growing climate technology group with activities in floating offshore wind, energy storage, Power-to-X hydrogen production and carbon capture and storage combined with green fuel production. For more information visit www.stiesdal.com.
