

Construction Manager

At *Stiesdal Offshore Technologies A/S* we offer the opportunity to make a real difference in the fight against climate change. Our team of creative thinkers are making true impact and joining us could be the most exciting and fulfilling step in your career.

Are you up for the challenge?

We are currently looking for a skilled Construction Manager to join our logistics team working on the development and planning of our future floating foundations for offshore wind.

About the job

You will be working on managing and planning the assembly process of the next generation floating foundation, where you will be part of the logistics team contributing to all phases from concept development to manufacturing and assembly of full-scale projects.

Your primary tasks will be:

- Aligning technical details with the design team in close corporation with the Chief Specialist
- Planning and managing subcontractor deliveries
- Planning and formalizing construction plans, cost estimates, and reporting & equipment overview
- Presenting and aligning assembly methodologies with clients and contractors

As Construction Manager, you will join the Logistics Team, where you will work closely together with your experienced co-workers. The job is an office position focusing on the planning phase, but some site activities should be expected.

Your profile

It is preferable that you have 2-5 years of experience from working with planning construction projects, preferably within the wind industry, offshore sector, or other relevant areas. Experience with international construction sites focusing on large steel structures is an advantage.

We expect you to approach your work with enthusiasm and to be self-driven, passionate, committed, and pro-actively solution oriented. It is natural for you to take on responsibility, and you are confident in the role of ensuring quality in large and complex projects. You perform well in the dynamic environment of a start-up organization.

What we offer

We offer an exciting and varied job where you will be an integral part of a team creating new technology with a high impact on climate change mitigation.

Our core values are honesty, integrity, and respect for people, and we firmly believe in the fundamental importance of trust, openness, teamwork, and pride in what we do.

The working location is at our main office in Give.

About us

Stiesdal Offshore Technologies is developing cost-efficient systems for floating offshore wind. During 2020 the company has validated its concepts and in 2021/2022, a new foundation type will be designed/manufactured.

We are part of Stiesdal, a new and fast-growing climate technology group with activities in floating offshore wind, energy storage, Power-to-X hydrogen production and carbon capture and storage combined with green fuel production. For more information visit www.stiesdal.com.
