

Measurement and test engineer

At *Stiesdal PtX Technologies A/S* we offer the opportunity to make a real difference in the fight against climate change. Our team of creative thinkers are making true impact and joining us could be the most exciting and fulfilling step in your career.

Are you up for the challenge?

We are currently looking for experienced measurement and test engineers for our field and laboratory tests to help realize our ambitious plans for Power-to-X hydrogen production.

Power-to-X, from concept to commercial scale

You will be working with our dedicated team to ensure full benefit and learning from our testing of electrolyze cells and stacks. Your job will involve close dialogue with our engineering team to ensure a structured documentation of our test-setup and results. This knowledge will be used in our roadmap for product development and improvements.

Your primary tasks will be:

- Creating and maintaining full documentation of ongoing test activities
- Documentation of test results
- Building and maintaining test setup, including measurement systems
- Feeding knowledge into our development

Your profile

You have several years of experience with designing and building tests, preferably in laboratory environments. You have comprehensive experience and knowledge with sensors of various kind as well as DAQ systems. Your educational background could be a practical education like electrician, machine fitter or automatic repairman, supplemented with an engineering degree.

We expect you to approach your work with enthusiasm and to be self-driven, passionate, and committed. It is natural for you to take on responsibility and you are confident in the role of playing a key role in large and complex projects. You perform well in the dynamic environment of a start-up organization.

What we offer

We offer an exciting and varied job where you will be an integral part of the design team creating new technology with a high impact on climate change mitigation.

Our core values are honesty, integrity, and respect for people, and we firmly believe in the fundamental importance of trust, openness, teamwork and professionalism, and pride in what we do.

The working location is at our offices in Give.

About us

Stiesdal PtX Technologies A/S is developing cost-efficient systems for green hydrogen production. During 2020 the company has validated its concepts and in 2021, the first medium scale plant will be established.

We are part of Stiesdal A/S, a new and fast-growing climate technology group with activities in floating offshore wind, energy storage, Power-to-X hydrogen production and carbon capture and storage combined with green fuel production. Read more at www.stiesdal.com.

How to apply

If you are interested, please send an application and your CV to job@stiesdal.com.

Start date: As soon as possible.
