

## Supply chain specialist

At *Stiesdal PtX Technologies A/S* we offer the opportunity to make a real difference in the fight against climate change. Our team of creative thinkers are making true impact and joining us could be the most exciting and fulfilling step in your career.

Are you up for the challenge?

We are currently looking for an experienced supply chain specialist to further develop our strategy for sourcing of materials and components in our ambitious plans for Power-to-X hydrogen production.

### **Power-to-X, from concept to commercial scale**

You will be working with our dedicated team and top management to drive the process of build, borrow, or buy strategy and to further develop our supplier strategy and relations. We have a steep curve from validation of products into full serial production, which makes this a central role in our strategy for product roadmaps and volume planning.

### **Your primary tasks will be:**

- Creating and maintaining strategy for SCM in general, including build, borrow, or buy strategies
- Developing supplier contracts
- Performing should-cost analysis based on various design iterations
- Driving cost improvement initiatives
- Ensuring strategy for, and right level of, product quality

### **Your profile**

You have a strong business sense and several years of experience with supply chain management and strategy in high volume products and global presence. It is second nature to you to always bring down cost and think production of scale. Comprehensive experience with should-cost and clean-sheet approach is an absolute must. Your background could be marine engineer or similar with at least bachelor level. It is an advantage if you have deep knowledge in both the electrical and mechanical fields. This role will require cross discipline experience and insight into strategy, economy, sourcing, and production methods.

We expect you to approach your work with enthusiasm and to be self-driven, passionate, and committed. It is natural for you to take on responsibility and you are confident in the role of playing a key role in large and complex projects. You perform well in the dynamic environment of a start-up organization.

### **What we offer**

We offer an exciting and varied job where you will be an integral part of the design team creating new technology with a high impact on climate change mitigation.

Our core values are honesty, integrity, and respect for people, and we firmly believe in the fundamental importance of trust, openness, teamwork and professionalism, and pride in what we do.

The working location is at our offices in Give.

### **About us**

Stiesdal PtX Technologies A/S is developing cost-efficient systems for green hydrogen production. During 2020 the company has validated its concepts and in 2021, the first medium scale plant will be established.

We are part of Stiesdal A/S, a new and fast-growing climate technology group with activities in floating offshore wind, energy storage, Power-to-X hydrogen production and carbon capture and storage combined with green fuel production. Read more at [www.stiesdal.com](http://www.stiesdal.com).

### **How to apply**

If you are interested, please send an application and your CV to [job@stiesdal.com](mailto:job@stiesdal.com).

Start date: As soon as possible.
