

## Project Manager

At Stiesdal Offshore we offer the opportunity to make a real difference in the fight against climate change. Our team of creative thinkers are making true impact and joining us could be the most exciting and fulfilling step in your career.

Are you up for the challenge?

We are currently looking for an experienced project manager to help realize the floating offshore wind foundations of the future.

### **From concept to commercial scale**

You will be managing our projects focusing on realizing the next generation of our floating foundation, which involves everything from concept development, detailed design work, manufacturing and physical testing to onshore- and offshore operations.

Your primary tasks will be:

- Motivate and inspire the team
- Project planning, budgeting, and execution
- Responsible for project progress
- Responsible for project contracting
- Planning and scoping of tasks
- Stakeholder management
- Process development

### **Your profile**

You are energetic and good-humored, able to promote a smile in those you work with and good at lifting people's spirit. You have a relevant education and solid experience in the field. We expect you to engage in your tasks with enthusiasm and commitment. You must be able to work independently and find it natural to take on responsibility and maintain an overview. Equally important is that you thrive in an environment driven by fast-paced development and innovation.

### **What we offer**

We offer an exciting and versatile job where you work with important new technologies and become an integral part of the Stiesdal team.

We are in the process of creating a workplace with good and spirited teamwork and easy workflows. Stiesdal's core values are honesty, integrity, and respect for people. We firmly believe in the fundamental importance of trust, openness, teamwork, and professionalism, and in taking pride in what we do.

Working location: Stiesdal's activities are spread over several locations in Give, Aarhus, and Copenhagen. Currently, our Offshore team has their primary workplace in Aarhus.

**About us**

Stiesdal Offshore is developing cost-efficient systems for floating offshore wind. During 2020 the company has validated its concepts and in 2022/2023, a new foundation type will be designed/manufactured.

We are part of Stiesdal, a young and fast-growing climate technology company with activities within floating offshore wind energy, energy storage, Power-to-X hydrogen production, and the capture and storage of CO<sub>2</sub> combined with the production of green fuels.
