

Supply Chain Manager

At *Stiesdal Hydrogen* we offer the opportunity to make a real difference in the fight against climate change. Our team of creative thinkers are making true impact and joining us could be the most exciting and fulfilling step in your career.

Are you up for the challenge?

We are currently looking for an experienced and strategic supply chain manager to further develop our strategy for sourcing of materials and components in our ambitious plans for electrolyzer production.

Hydrogen electrolyzers, from concept to commercial scale

You will be working with our dedicated team and management to drive the process of continued evaluation of build or buy strategies and to further develop our supplier strategy and relations. We have a steep curve from validation of products into full serial production, which makes this a central role in our strategy for product roadmaps and volume planning.

Your primary tasks will be:

- Creating and maintaining strategy for SCM in general, including build, or buy strategies
- Establishing a process for material hedging and ordering decisions
- Developing supplier contracts and concluding supplier agreements
- Performing should-cost analysis based on various design iterations
- Driving cost improvement initiatives
- Ensuring strategy for right level of product quality

Your profile

You have a strong business sense and several years of strategic experience with supply chain management in high volume products and global presence. It is second nature to you to always bring down cost and think production of scale. Comprehensive experience with should-cost and clean-sheet approach is an absolute must. It is an advantage if you have knowledge in both the electrical and mechanical fields. This role will require cross discipline experience and insight into strategy, economy, sourcing, and production methods.

We expect you to approach your work with enthusiasm and to be self-driven, passionate, and committed. It is natural for you to take on responsibility and you are confident playing a key role in large and complex projects. Equally important is that you thrive in an environment driven by fast-paced development and innovation.

What we offer

We offer an exciting and varied job, where you will be an integral part of the Hydrogen team, creating new technology with a high impact on climate change mitigation.

Our core values are honesty, integrity, and respect for people. We firmly believe in the fundamental importance of trust, openness, teamwork, and pride in what we do.

The working location is at our offices in Give or Copenhagen.

About us

Stiesdal Hydrogen A/S is developing cost-efficient systems for green hydrogen production. During 2019-2022 the company has validated its concepts and in 2023, the first commercial MW units will be put into operation followed by a very steep volume plan for 2024. We are part of Stiesdal, a young and fast-growing climate technology company with activities in floating offshore wind, energy storage, Power-to-X hydrogen production, and carbon capture and storage combined with green fuel production.
