

Project Manager – Business Enablement

Are you an experienced project manager with a background in one or several of the topics: health, safety, environment or quality? Do you know how to leverage IT tools to effectively address and solve complex issues?

You might be the perfect fit for our team!

Join a creative group of thinkers dedicated to making a difference in the fight against climate change.

As our Project Manager, you will be empowering your colleagues to integrate health, safety, environment, and quality regulations in their everyday work in simple and impactful ways.

About you

You are a strategic thinker with strong interpersonal skills and a track record of building solid collaborative relationships with your colleagues. You have previously supported diverse teams on topics such as IT, health, environment, safety, quality. In addition, you:

- have 5+ years of experience as a project manager serving 50+ stakeholders and can seamlessly apply your solid project management toolbox to any topic
- are a proactive stakeholder manager who inspires commitment and action
- are purpose-driven and aim to create value in everything you do
- thrive in a dynamic environment where you get ownership over structuring your role
- are curious, learn quickly and take charge of your own development

Your tasks and responsibilities

You will be supporting Stiesdal's health and safety agenda, enabling your colleagues to develop high quality and safe designs, while expertly managing stakeholders across four subsidiaries located at multiple sites in Denmark. In addition, you will:

- conduct internal audits to ensure compliance with our management system
- develop, adjust, implement and align procedures in collaboration with your colleagues
- facilitate knowledge sharing across teams and technologies
- establish improvement plans in cases of non-conformance with our management system
- support implementation of IT solutions together with internal and external stakeholders

What we offer

We are a climate technology company with activities in floating offshore wind, energy storage, hydrogen production, as well as green fuel production and carbon capture.

We are a dynamic company in growth where professionalism, flexibility and kindness are key words in every position. As a workplace, we prioritize teamwork and easy workflows and we act with integrity, practice generosity, aim for simplicity, choose action and show respect.

As a Stiesdal employee, you will be able to influence and co-create your position. We offer opportunities for continuous professional and personal development and compensation that matches your qualifications.

Practicalities

The Project Manager position is physically based in our office in Give or Copenhagen, and some tasks will require you to travel to our other locations. We believe that we do our best work when we share the same physical space.

You will be working closely with our head of business enablement in a growing enablement team that supports all four Stiesdal subsidiaries on topics such as HR, IT, health, safety, environment, quality.

How to apply

If you are interested in this position, please send an application and your CV to jobs@stiesdal.com.

Start date: As soon as possible.

For further information, please contact our Head of Enablement, Marie Munk Andersen at mma@stiesdal.com.

Interviews will be held on an ongoing basis and the position will be filled as soon as we identify a suitable candidate.
