

Site Manager

At Stiesdal Hydrogen, we offer you the opportunity to make a real difference in the fight against climate change. Our team of creative thinkers is making true impact and joining us could be one of the most exciting and fulfilling steps of your career.

Are you up for the challenge?

We are on the lookout for a skilled and passionate Site Manager to aid in realizing our ambitious plans for Power-to-X hydrogen production.

Power-to-X, from concept to commercial scale

The primary purpose of this role will be to take on the responsibility and authority for the safe and technical execution of work at specific customer sites.

You will have directive and decision-making authority for all operations at the site. In addition, you will ensure that all work is performed in accordance with Stiesdal Hydrogen standards and regulations.

Your primary tasks will include:

- Providing visible, strong, and active EHS (Environmental, Health, and Safety) leadership.
- Ensuring that activities at the site comply with the company's safety instructions. In the case of deviations, you will be responsible for developing and implementing countermeasures in alignment with the Project Manager, while providing transparency for early warnings for escalation and reporting.
- Take ownership of risk management.
- Ensuring the planning and coordination of all site activities in alignment with the Project Manager.
- Appointing a substitute in your absence to oversee on-site activities, such as ensuring externals read safety cards and are introduced to the site layout, etc.
- Being actively involved in maintenance work on the units on site.
- Conducting daily toolbox talks, if necessary or decided.
- Participating in customer meetings regarding site activities.
- Monitoring the units, typically within normal working hours, but also regularly on weekends/holidays.

Your profile

You possess in-depth technical knowledge and, preferably, an understanding of process systems. You are solution-orientated and capable of thriving in the dynamic environment of a new business.

You have a solid understanding of work processes at project sites, encompassing assembly, commissioning, and maintenance expertise. You are expected to be focused on EHS and

Quality, capable of identifying risks proactively and have a thorough knowledge of EHS processes.

To be successful in this role, you must possess excellent communication skills, both written and verbal, and be a strong team player.

A central aspect of this job requires being physically present on-site. Therefore, you must be prepared for travel time (depending on where you live) and long days on-site at various locations throughout the country. Currently, our customer sites are primarily located in Southern Denmark.

What we offer:

An exciting and versatile role at Stiesdal Hydrogen, where you engage with cutting-edge technologies and become integral to our mission. We foster a culture characterized by good-spirited teamwork, engagement, flat hierarchy, and continuous learning, all centered around trust, transparency, and professionalism.

Enjoy the freedom to influence and co-create your role, with opportunities for professional and personal development, and compensation matching your qualifications.

Location: Primary working location will be our office in Give and/or at our customer sites in south Jutland.

About Stiesdal Hydrogen:

We are committed to developing innovative solutions to bring down the cost of green hydrogen. In 2023 we have validated our concepts and delivered the first units of our 3 MW HydroGen Electrolyzer to customers. This journey will continue and ramp up in 2024.

We are part of Stiesdal, a fast-growing climate technology group with activities in floating offshore wind energy, energy storage, Power-to-X hydrogen production, and carbon capture and storage combined with green fuel production.
